Framework: **Laravel, Django, Flutter, Bootstrap, Wordpress**

Software: **Android Studio, Microsoft-office, Visual Studio**

PROJECT EXPERIENCE

- i. FindChim app
Over thousands of Bhutanese people have hard time finding a new home. We concluded that people leaving homes to relocate to another place needed more than just a house. We plan to let them have their choice of home by using our application (free). The proprietors within the community can register and post their available house for rent. This platform will help both the proprietor and the tenant to have a better living community.

https://play.google.com/store/apps/details?id=webdyno.bhutan.find_home_bhutan
- ii. COVID-19 Statistics App
Completed a stay home project during the pandemic of 2020, it provides real time updates of COVID-19 statistic globally or country based.
Download link: www.webdynobhutan.com
- iii. Nepal Travels and Tours (Web application)
www.nepaltravelsandtours.com
Developed travel agency web application for Switzerland Company where its branch is located at Nepal.
- iv. Dangsar Tour (Travel Agent Web application)
www.dangsartour.com

Successfully completed the Travel Agent web app for dangsar tour (Travel Agent in Bhutan).

- v. Druk Thuendhap
Developed prayer app for my College (Gyalpozhing College of Information Technology) which provide various prayers including hymn (Zhabthoen) and grace(Tomchay).
- vi. Phobjikha Resort
I have work on developing resort website (www.phobjikharesort.bt).
- vii. Started freelancing website / Blog
www.webdynobhutan.com
- viii. Goyega: An Information Sharing App
Completed as a final year project. It is a mobile application which provides a platform for users to access and post relevant news within Bhutan.
